

► Project: Batteries Europe

Building an attractive European R&I ecosystem on batteries

3 core partners; EUR 998,575.00

EERA, InnoEnergy and EASE, supported by Zabala and Clerens Consulting for logistics, communication and administrative tasks, are committed to set up an agile, inclusive, operational and proactive European Technology & Innovation Platform (ETIP) on batteries. One of the main added value of Batteries Europe is to create an epicenter of information and exchanges on R&I efforts in the EU on batteries, while establishing strong relations with existing fora active in the battery R&I value chain.

Contact@EERA: **Ivan Matejak**

EERA's role:

- Contribution to the establishment and management of the ETIP
- Development of the Strategic Research Agenda
- Coordination of public and private R&I efforts on batteries
- Organisation of meetings and events
- Project management and communication activities
