

## ► Project: INTENSyS4EU

Integrated Energy System – A pathway for Europe

8 partners; EUR 3,998,284.95

*The overarching goals:*

- *To support the further integration of innovative solutions in view of hosting 45% of variable renewables by 2030;*
- *To extend the existing research and innovation roadmaps through permanent and direct interactions with the impacted energy system stakeholders and all the Member States in view of validating the portfolio of innovative solutions via appropriate funding mechanisms.*

Contact@EERA: Elena Dufour

### EERA's role:

► Coordination of the 9 EERA third parties through:

- Participation in workshops
- Support to the ETIP SNET platform
- Stakeholder and expert contribution in reports and roadmaps
- Communication, dissemination and administration activities
